

Smart Numbers™

Smart Numbers™ enables business owners to measurably improve their business performance and value using a specially designed reporting and evaluation system. Smart Numbers can be tailored to almost any type of business or industry.

FINH will produce a series of dynamic graphical score cards based on up-to-date financial and non-financial data to measure how your business is performing. FINH then implements action-orientated strategies to improve performance which meet valuation targets that have been set by you.

FINH will conduct quarterly or monthly reviews with you to monitor performance and growth. With this system you can quickly and easily conduct regular reviews to critically analyse the results of your decision making and adjust your strategy to ensure your valuation targets are met.

You can also use this tool to understand the key drivers that will help you to manage your business.

Who Uses Smart Numbers™?

- Managers and executives who are seeking to gain insight into performance.
- Business owners and Directors who want to know what increases the value of their business and what inhibits growth.
- Goal oriented business owners who want to be kept on target with their growth strategy and with the ongoing review process provided by Smart Numbers.

- Director and Managers who want quick access to up-to-date information including non-financial indicators (eg client and staff satisfaction, sales conversion rates).

What are the Benefits of Using Smart Numbers™?

- Reliable and easy to follow reports demonstrating the organizations performance, weakness and value.
- Set realistic goals and strategies for growth.

- Increase the value of your business through improved efficiencies and productivity.
- Make quick proactive decisions within your business and monitor the results.
- Have a finger on the pulse of your business.
